Mainframe facts

- **Who uses mainframes?**
 - Most Fortune 1000 companies use a mainframe environment
 - 60% of all data available on the Internet is stored on mainframe computers
- **Why mainframes?**
 - Large-scale transaction processing
 - Thousands of transactions per second
 - Support thousands of users and application programs
 - Simultaneously accessing resources
 - Terabytes of information in databases
 - Large-bandwidth communications
- **There are more CICS transactions processed daily than Web pages served**
